

1. Site Map/Navigation Map

2. Wireframes

The wireframes of the project can be found here:

<https://wireframepro.mockflow.com/view/M7fc2c4e6a80acbbe8b1540b35cec42651550430805300> .

Per the subscription constraints, I could only make no more than three pages, but all the other pages are included in the mockups below.

3. Mockups/Designs

Figma was used to create the project mockups and they can all be found here:

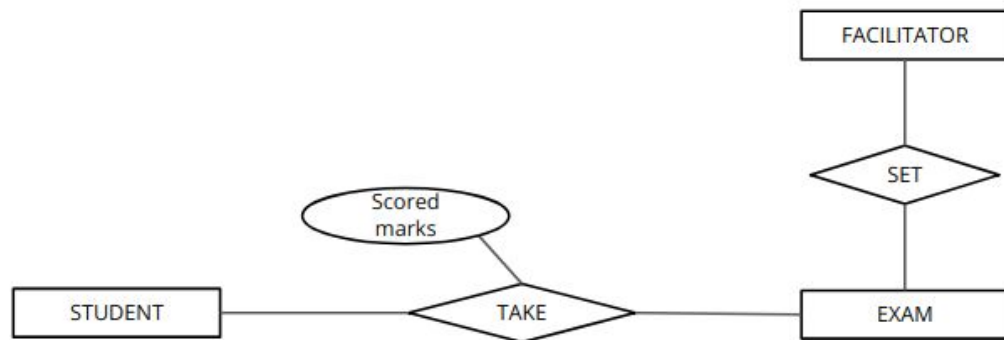

<https://www.figma.com/file/GgqkokmZfsrJkJfF81YJrpei/Quizzes-Web-App?node-id=1%3A2>

4. Database Design

In case the project is expanded to store more information about students scores, there will be a need for a database.

The database is supposed to have a table of exams which contains all questions and reference to their course.

And there will be two tables for users who are students and teacher

ERD for Proposed Database
